

GoPlant from SKF

GoPlant release notes
Revision **2024.3**

1 GoPlant Enhancements

1. Website: Multiple performance enhancements.
2. Website: Fixed issue where velocity readings were inconsistent between the form viewer and answer history.
3. Website: Updated asset import to ignore case in asset tags, allowing user to update asset with matching tags when the case is different.
4. Website: Updated form viewer to highlight vibration and temperature alarms.
5. Reporting: Resolved issue where Round Element Detail report would display duplicate elements
6. Reporting: Corrected task total count in “status” reports.
7. Reporting: Fixed Daylight Savings Time handling in Task Completion report.
8. Mobile Device: Addressed issue where answer history was not displaying correctly.
9. Mobile Device: Fixed performance issue causing timeouts on login.
