Version: All

Abstract

This document details the procedure necessary to automatically set the ActiveSync Partnership as a 'Guest Only' option when a Marlin is docked.

Overview

To avoid seeing the annoying Microsoft ActiveSync partnership message each time the Marlin is docked, an entry should be added into the PC Registry which allows the Microsoft ActiveSync partnership to be automatically set as 'Guest'.

Follow the procedure below to set up this option:

- Select **Start → Run** from the computer.

- Type the word 'regedit' into the **Open:** field, and then press [OK].

- Navigate to
  `\HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows CE Services`

- Right-click on an empty section in the window pane on the right-hand side.

- Select New-DWORD Value and name it **GuestOnly**.

- Right-click on the new GuestOnly entry and select the Modify option.

- Change **Value data:** from '0' to '1'. Leave Base as Hexadecimal, and then press [OK].

- Close the Registry Editor.

Now, whenever the Marlin is connected to the USB port of the computer, the Microsoft ActiveSync partnership will automatically choose 'Guest'.
