

Knowledge Base Article

Product Group: Software
Product: CMSW7400 - @ptitude Analyst (with Oracle)
Version: 7.0 or later

Abstract

This article includes a script to validate database schema for SKF @ptitude Analyst 2012 and later releases in Oracle.

Overview

Follow the steps below to execute the script.

1. Save the script file "OracledbCheckIntegrity.sql" located to the right of this article under Attachments. [Figure 1] If the article is not being viewed from within the Technical Support Self-Help Portal, please contact TSG to obtain a copy.

Figure 1. Attachments section

2. Place the script file in the location where SQLPlus is pointing to (or just type the full path of the file in SQLPlus and proceed to step 4).
3. In SQLPlus, connect as 'skfuser1' and type @OracledbCheckIntegrity.sql;
4. Press Enter to execute the script.

For further assistance, please contact the Technical Support Group by phone at 1-800-523-7514 option 8, or by e-mail at TSG-CMC@skf.com.
