Product Group: MARLIN I-Pro
Product: Microlog Inspector Secure
Version: 1.02

Abstract

It has been determined that if SKF Microlog Inspector Secure version 1.02 (which was released with SKF Microlog Inspector version 1.4.4.1) is installed to the 'SD Card' or 'Flash File Store', then SKF Microlog Inspector Secure does NOT automatically start up after installation, or after a soft or hard reset. The application would need to be manually started, which defeats the purpose of the application (which is to keep the operators from accessing unwanted programs/applications).

Overview

The current Microlog Inspector Secure version 1.02 only functions properly if installed to the 'Device', as shown in Figure 1:

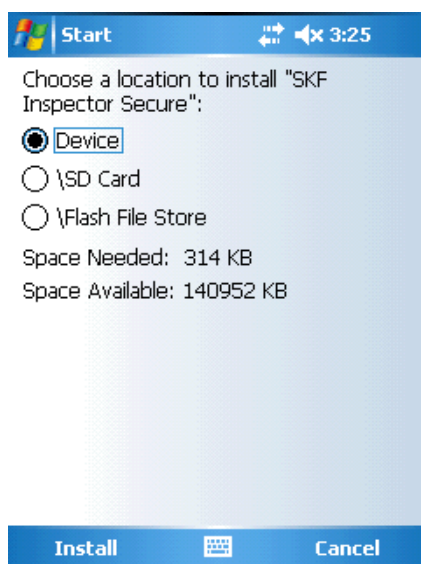

Figure 1. Install on 'Device'
