Abstract

This article covers the authorized installation configurations for standalone (single user) SKF @ptitude Analyst software.

Overview

There are only two configurations that SKF allows for standalone software installations. They are outlined in the following examples:

NOTE: All services and applications MUST be running on <u>one computer</u>. Anything else will be in violation of the license agreement.

<u>Example 1</u> – Standard Installation

Windows 7/XP PC

- @ptitude software application

- Database Manager

- Transaction Server service

- SKF services

<u>Example 2</u> – Acceptable Installation

Windows 7/XP PC

- @ptitude software application

- Transaction Server service

- SKF services

Windows 2008R2

- Database Manager
