# Knowledge Base Article

**Product Group:** MARLIN I-Pro
**Product:** CMDM 6600 – Microlog Inspector
**Version:** N/A

## Abstract

This article provides instructions on how to set up the CMDM 6600 series I-Pro system to communicate over a network through a proxy server using the CMAC 6156 Ethernet adapter or CMAC 6153-E Quad Dock.  Although the procedure will vary slightly for other CMDM models, these instructions can still be used as a reference.

## Overview

Follow the steps below to configure the CMDM 6600 series I-Pro device to use a proxy server.

### Configuring Adapter Connection

1.  On the handheld, go to **Start > Settings > Connections**.
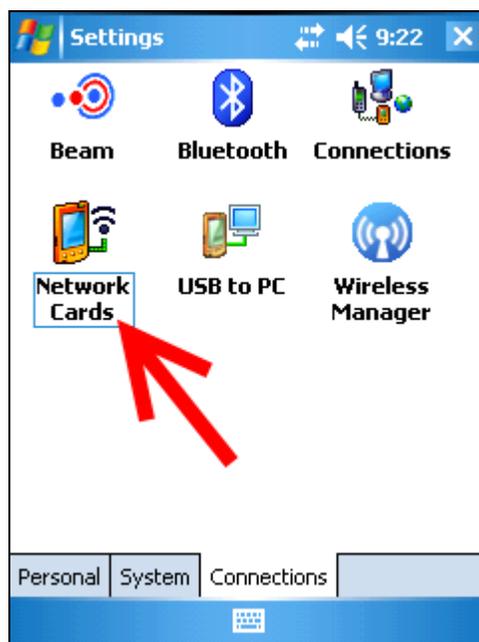

2.  Select **Network Cards**.  [Figure 1]

**Configuring Proxy Settings**

5. Click on **Connections**.  [Figure 3]

Figure 3. **Connections** icon

6. Click the <u>Set up my proxy server</u> link.  [Figure 4]

**Figure 4.** Setting up the proxy server

`

7. Check the options *This network connects to the Internet* and *This network uses a proxy server to connect to the Internet*. [Figure 5]

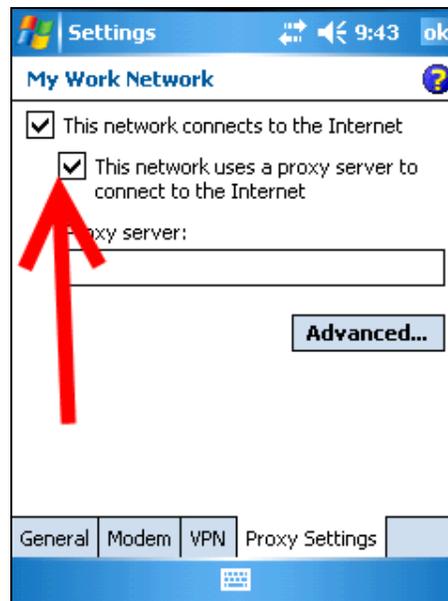

**Figure 5.** Proxy server settings

8. Type the proxy server IP address in the **Proxy Server** field. [Figure 6]
   A fictitious IP address is shown in the example below:

**Figure 6.** IP address field

`

9.  Next, click on the **Advanced...** button.

10. Click on **HTTP**.  [Figure 7]

**Figure 7.** HTTP settings

11. Configure the **Port** number.  [Figure 8]

**Figure 8.** Configuring port

`

12. Click **OK** in the upper right corner to save.
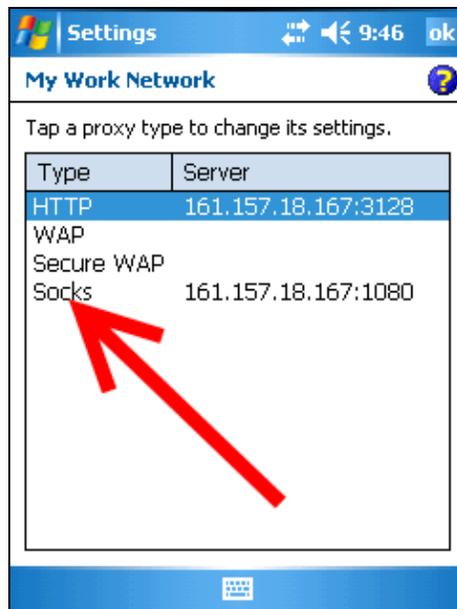

13. Next, click on **Socks**.  [Figure 9]

**Figure 9.** Socks settings

14.  Configure the **Port** number.  [Figure 10]

**Figure 10.** Configuring port

`

15. Click **OK** in the upper right corner to save.

16. Click **OK** again to save.

17. Click **OK** again to save once more.

The CMDM 6600 device is now configured for communication through a proxy server.
