Product: CMSS668H-5

Version: N/A

Abstract

This article describes the CMSS668H-5 system that is now being used as a replacement for the older CMSS668-5 Long Range Eddy Probe System.

Overview

The CMSS668H-5 long-range system has been defined to replace the older CMSS668-5 system. The CMSS668H-5 system uses a series of probes and extension cables that are specifically calibrated for the CMSS668H-5 system. These probes and cables can only be used with CMSS668H-5 drivers and are only interchangeable within this specific series. They are not interchangeable with our standard series of probes, extension cables, and drivers.

Eddy Probes:

CMSS68-**14**x-xx-xx-xx, Eddy Probe, 8mm, Standard replaces CMSS68-00x-xx-xx-xx probes in long-range system applications.

CMSS68-**15**x-xx-xx-xx, Eddy Probe, 8mm, Armored replaces CMSS68-01x-xx-xx-xx probes in long-range system applications.

CMSS68-**16**x-xx-xx-xx, Eddy Probe, 8mm, Fiberglass Sleeving replaces CMSS68-02x-xx-xx-xx probes in long-range system applications.

Extension Cables:

CMSS958-**50**-xxx, Extension Cable, Standard replaces CMSS958-00-xxx in long-range system applications.

CMSS958-**51**-xxx, Extension Cable, Armored replaces CMSS958-01-xxx in long-range system applications.

CMSS958-**52**-xxx, Extension Cable, Fiberglass Sleeving replaces CMSS958-02-xxx in long-range system applications.

Drivers:

CMSS668**H**-5 Long Range Driver, 8mm replaces

CMSS668-5 in long-range system applications
