Abstract

This article explains why a user may see the error, "Mal 1900 fail free = 010608," when selecting Coded Notes, and provides a possible solution.

Overview

More than likely when this error is encountered, there is a Coded Note that is too long.

For **single digit** Coded Notes entries (0-9), the Coded Note must not exceed 35 characters (including spaces).

For **double digit** Coded Notes entries (10-99), the Coded Note must not exceed 34 characters.

To resolve this error, go through the Coded Notes list and shorten any Coded Notes that exceed these limitations by abbreviating the message.

For further assistance, please contact the Technical Support Group by phone at 1-800-523-7514 option 8, or by email at TSG-Americas@skf.com.
