See what's new in Compass Version 1.0.3. New features, enhancements and bug fixes

1. New Features

- 1.1. Create “site details” page [#718103]: enable the user to manage each company’s site details (e.g. company name, customer logo update, site name and address) within Compass.
- 1.2. ‘Analysis backlog’ – ‘Device fault’ and ‘No Measurements 24h’ analysis reasons [#740587]:
 - 1.2.1. ‘No Measurements 24 h’ fault type alarm is added and shall be presented as a separate reason in the Analysis backlog.
 - 1.2.2. ‘No Measurements 24 h’ fault type is added to the filter for analysis reasons
 - 1.2.3. Remove the count from ‘device fault’ and ‘No Measurements 24h’ stickers.

2. Enhancements

- 2.1. ‘Devices and sensors’ side menu: update the design showing the alarm thresholds
- 2.2. Fault widget: the applied filter should remain after returning from previous page
- 2.3. Date picker: after removing default date, ‘apply’ button should be enabled
- 2.4. Overview: ‘Company’ column name changed to ‘site’, and Hyperlink was added to each site name to redirect the user to insight dashboard
- 2.5. Technical debt improvements on:
 - 2.5.1. Gold layer
 - 2.5.2. BE application
 - 2.5.3. FE application

3. Bug Fixes

ID	Bug Title and details
736297	Analysis Backlog: “Amount of Assets is not the same as on QA and PROD/STAGING env for the same customer – part of the GOLD layer improvements
741598	Analysis backlog: when download CSV file, the “Days since last reported” is displaying as 1 for every asset except never reported
