

GoPlant from SKF

GoPlant release notes Revision **2025.1**

Copyright © 2025 by SKF Group All rights reserved.

SKF 1 Notice: End of Life for Windows Mobile app announced

Beginning with the 2025.4 release, the GoPlant mobile application will no longer be available for Windows mobile devices. Please migrate to iOS or Android devices before the 2025.4 release of GoPlant which is targeted for December, 2025.

2 Report Scheduling

Users can now schedule their own standard reports directly in GoPlant via the web browser. This functionality enables a report to run at a scheduled interval and its results saved to a file or sent via email to one or more GoPlant users. Please note that GoPlant report scheduling is only available for built-in standard reports, not user defined or Jasper reports.

To schedule a GoPlant standard report, navigate to the report schedules tab as shown below.

Figure 1: Report Schedules Tab

To create a new report schedule, click the "New Report Schedule" button. To edit an existing report schedule, click on the report name. Editing or creating a report schedule opens the report schedule editor seen below.

Edit Report Schedu	le My Scheduled Report	🖹 🗶
General	Schedule Output	
Name *	Enter the report schedule name	
Description	Enter the report schedule description	
Report *	Select a report	

Figure 2: Report Schedule Editor

The editor has three tabs:

- 1. General Specify report schedule name, select the report to run, and specify its input parameters
- 2. Schedule Define the schedule for running the report
- 3. Output Specify the report output format, filename for saving the report, and list of email recipients

For premise installations of GoPlant, the folder where report output is written is controlled by the administrator reports setting, Output Folder for Scheduled Reports, which is shown below. Please note that the folder is specified using a Windows fully qualified path name.

6 ASH	80ARD	MANAGER	REPORT	TS ADMIN	1	•			South Array	GRPLAN

								-				

Figure 3: Scheduled Report Output Folder

For GoPlant SaaS customers, any scheduled report output that is saved to a file will be written to the customer's SFTP folder on *sftp.goplant.mobi*. If you need assistance accessing your SFTP folder, please contact technical support.

3 Standard Report Updates

We continue to replace existing Jasper reports with built in GoPlant reports. These new built-in reports can be scheduled using the new built in scheduling feature or run on demand from GoPlant.

Future releases of GoPlant will continue to consolidate the older Jasper-based reports into newer built-in reports. All built-in reports will be available to schedule directly in GoPlant. Once all reports have been migrated, GoPlant will no longer support Jasper reports.

The following table lists the new built-in reports, and lists the older Jasper reports they replace.

New Report	Replaced Reports				
Exceptions	GoPlant – SG Exception				
	GoPlant – SG Exception Count				
	GoPlant – SG Exception Count Detail				
	GoPlant – SG Exception Status				
	GoPlant – SG Exception Status by Options				
Export Responses to CSV	GoPlant – CSV External Tag Export				
	GoPlant – CSV Historian Export				
	GoPlant – CSV Response Export				
	GoPlant – CSV Round Response Export				
	GoPlant – CSV Task Response Export				
Round Review Status	GoPlant – Round Review Status				
Tag Summary	GoPlant – Tag Summary				
User Detail	GoPlant – User Summary				
User Login	GoPlant – User Login				

Additionally, the following Jasper reports have been removed from the GoPlant report panel.

- GoPlant Round Count by User
- GoPlant Round Tag Source Print w/ Options
- GoPlant Status Task Detail by Day
- GoPlant Status Task Detail by Shift

4 Pause Tasks

GoPlant now supports pausing scheduled tasks. Pausing a task prevents future instances of the task from being scheduled until the task is resumed.

To pause tasks in GoPlant, navigate to the tasks panel, if there are active tasks in the currently selected storage group, a Pause Tasks button will be displayed.

[ASHBOARD	پ MANAGER	REPORTS	🔅 ADMIN	£ 🕞			South Array	GRPLANT	-
